OFFICE MEMORANDUM
SGOD-2022-037

To: School Health Personnel

Subject: **DISSEMINATION OF DOH'S PUBLIC ADVISORY ON HAND, FOOT AND MOUTH DISEASE**

Date: November 21, 2022

1. Attached is the from the Office of the Undersecretary for the Governance and Field Operations No.2022-03-1690 dated October 19,2022, with the same subject.
2. The Department of Education Regional Office XI, through the Education Support Services - Scholl Health Division (BLSS-SHD), disseminates the Department of Health's (DOH) public health advisory (Annex A) against the highly infectious Hand, Foot and Mouth Disease (HFMD) common in young children.
3. This is to ensure the safety learners amidst an outbreak of the disease in several towns in Batangas province, particularly in the areas of San Pascual and Cuenca, wherein over 100 children have been reported to have caught the highly infectious viral infection, prompting the suspension of face to face classes in all public and private schools from elementary to secondary.
4. In line with this, all schools health personnel in this Division should strategize in educating the learners to practice /strengthen preventive habits or minimum public health standards against viral infection such as frequent handwashing and observing health and safety measures such as wearing a face mask and proper sneezing/coughing practices by covering one's mouth when sneezing or coughing to avoid the transmission of infection.
5. Equal Opportunity Principle (EOP) in all endeavors for all teaching, non-teaching personnel and learners of the Division of Davao del Norte, shall be strictly observed.
6. At all times, please be reminded of the observance of the new normal Local IATF health protocols.
7. Immediate and wide dissemination of this Memorandum is desired.

REGIONAL MEMORANDUM
 ESSD-2022-234

To : Schools Division Superintendents

Subject: DISSEMINATION OF DOH'S PUBLIC ADVISORY
 ON HAND, FOOT, AND MOUTH DISEASE

Date : November 2, 2022

Attached is the Memorandum from the Office of the Undersecretary for Governance and Field Operations No. 2022-03-1690 dated **October 19, 2022**, with the same subject.

The Department of Education, through the Bureau of Learner Support Services - School Health Division (BLSS-SHD), disseminates the Department of Health's (DOH) public health advisory (Annex A) against the highly infectious Hand, Foot, and Mouth Disease (HFMD) common in young children.

This is to ensure the safety of the learners amidst an outbreak of the disease in several towns in Batangas province, particularly in the areas of San Pascual and Cuenca, wherein over 100 children have been reported to have caught the highly infectious viral infection, prompting the suspension of face-to-face classes in all public and private schools from elementary to secondary.

In line with this, all school health personnel in this Region should strategize in educating the learners to practice/strengthen preventive habits or minimum public health standards against viral infection such as frequent handwashing and observing health and safety measures such as wearing a face mask, and proper sneezing/coughing practices by covering one's mouth when sneezing or coughing to avoid the transmission of infection.

Immediate and wide dissemination of this Memorandum is desired.

Hand, Foot, and Mouth Disease

Hand, foot, and mouth disease (HFMD) is a common viral illness of infants and children. It should not be confused with foot-and-mouth (also called hoof-and-mouth) disease of cattle, sheep, and swine. Infected individuals are most contagious during the first week of their illness. HFMD cannot be contracted from pets or animals. Incubation period is 2-14 days.

Cause

A virus of the family Picornaviridae, genus *Aphthovirus*

Mode of Transmission

Spreads by contact with nose and throat discharges, saliva of infected persons, or after touching contaminated objects

Signs and Symptoms

- Fever
- Sore throat
- Feeling of being unwell (malaise)
- Painful, red, blister-like lesions on the tongue, gums, and inside of the cheeks
- Red rash, without itching but sometimes with blistering, on the palms, soles, and sometimes the buttocks
- Irritability in infants and toddlers
- Loss of appetite

Treatment

- Treatment is directly toward relief of symptoms (fever and sore throat).
- There is no specific treatment. Signs and symptoms usually clear up in 7-10 days.
- A topical oral anesthetic may help relieve the pain of mouth sores.
- Over-the-counter pain medications other than aspirin, such as acetaminophen or ibuprofen, may help relieve general discomfort.

Prevention and Control

- There is no specific way to prevent the infection. Good hygiene (e.g., proper handwashing) can decrease the risk of spreading the disease.
- Disinfect premises and all infected materials (implements, cards, clothes, etc.).
